

TOSSUP 99

Ventura County Forming a R/C Modeler Association

7/29 - A kick-off meeting was held tonight to form an R/C modeler association within Ventura County. This association will initially consist of the six local R/C airplane clubs (Ventura County Comets, Simi Valley Flyers, Conejo Valley Flyers, Camarillo Flying Circus, Thousand Oaks Soaring Society, and Channel Islands Condors). The goals of the association is to "Establish a joint usage Ventura County Regional Flying site". Its objectives are to:

- 1) "Educate our Ventura County flyers in the importance of an association."
- 2) "Keep or acquire flying sites."
- 3) "Public relations, inform the public how we benefit the County."
- 4) "Youth programs, establish and maintain"

The concept of the association was developed because two clubs (Conejo Valley Flyers and Channel Island Condors) are searching for new flying sites. CVF has recently lost their field and CIC field will be closing with the next 7 to 9 months. It seems that neither club with their limited memberships have enough political clout within the city/county/state/federal arena to quickly obtain a new location for their activities. As an association representing over 700 local AMA members (R/C powered aircraft and sailplanes), it is hoped that enough clout will be held in order to be heard within the political circles.

Immediate activities will include picking a name, create a mailing to solicit funds and communicate to county AMA members, nominate officers, incorporate the association and hire a spokesperson. As you imagine, this will take money. Each club is being asked to donate \$100 (more will be gladly be accepted) to the association to initially be used to pay for incorporation and to cover the cost of the mailing. Additional funds will have to be obtained to cover future legal costs and the spokesperson.

Meeting minutes - Each club of the association was represented by a club officer. Also attending was Don Goeschi, Associate Vice President of District X of the AMA. The association name of 'Ventura County R/C Modelers Association' was selected. Incorporation (5013C?) will likely to be in California or Nevada, which ever ends

up being cheaper. It was recommended that the association officers not include any club officers who are actively participating in obtaining a new flying site for their own club. Side Note - The CVF and CIC will continue to pursue their own endeavors individually. VCRCMA will pursue obtaining a regional site (independent of all clubs) and will only provide representation of Ventura County flyers in backing CVF and CIC in their efforts. Edgar Weisman (TOSS) has volunteered to bring maps of the area to the next meeting to help locate possible flying sites. If there are any club members that are willing to provide free or substantially reduced rate legal representation or as the spokesperson, they should inform the association of such. Once the association is formed, the AMA will be solicited for financial and political backing. The support of R/C boat and car enthusiast will not be sought after at this time but may be at some future date. The next association meeting will be held Monday, August 9th.

TOSS involvement - You are probably by now thinking why should TOSS participate since we already have a flying field or what is in this for me. The answer is simply, Your future in the hobby is depending upon it. All clubs eventually lose their flying fields. In the past year alone, 18 clubs have lost their fields in Southern California. Each year, it gets more and more difficult to obtain/retain a field. When we lose our field someday in the future, we will be asking for VCRCMA backing. Hopefully, they will be there to help us.

During the August TOSS club meeting, we will be voting on the approval of TOSS participation within the VCRCMA in conjunction with the \$100 initiation fee. If you will not be present at the meeting and wish to have your vote included, please contact any club officer and inform him of your approval or disapproval. And when you receive the solicitation from the association for a donation, please give as much as you can. Don't think of it as a donation, rather, you should consider it an investment in future enjoyment.

“Built Up / Bent Wing” Contest

This annual extravaganza replaced the regular monthly contest, allowing owners of quasi-vintage sailplanes to fly with others of like type without the distraction of composite “glass slippers” or bounce-o-matic foam planes. The contest consisted of four tasks of 3 minutes, 5 minutes, 8 minutes and 4 minutes scoring one point per second up to the time with one point per second penalty for over plus a ten percent of the flight points bonus for landing in a 25' circle. Team placings were changed to be the top two scores from each club participating to allow all of the clubs attending to have a chance at the trophies, trophies which were offered for up to the top four placing from the winning club.

Flying conditions were good to ideal - clear skies, little consistent wind apart from thermal activity to start building during the morning to the onshore breeze that's typical for this time of year. The air temperature was cool for August - in the upper 70s - which made participating pleasant.

The first round was a short round that was more a test of whether contestants could remember how to spot land a polyhedral plane. Some couldn't and there were several significant overshoots of the landing area. Things rapidly settled down to an evenly paced contest with few glitches in the launch and 'incidents' during flying. There were a

couple of serious crashes, one caused by a wing failure which caused the plane to spiral in over the extreme north-east of the field and the other caused by a rudder falling apart on launch causing the plane to come down on a driveway on Gainsborough just over from the flying field. Both these caused extensive damage to the planes. (There were two other incidents - one being loss of elevator control and the other being a plane hung up in the retriever but both planes were brought down without damage.)

Once the contest was over it was discovered that there was a tie for the top two places. A fly-off round of 3 minutes scoring up to 100 points on a 50' tape was used to decide the winner. Mike Reagan took first place with 2:58/84 against Jerry Tonnelli's 3:01/75, a very narrow margin. He probably deserved the title, though, because of the plane he was flying. He was sharing Edgar's, a plane that flew fine but had “something weird” about the spoilers that made them unusable for spot landings. (They would cause the plane to yaw about when deployed - OK for losing height but useless on approach.) . Mike therefore had to land the thing without using spoilers - a significant feat.

Right - Winning the contest. Mike Reagan, with Edgar timing, landing to win the fly-off. The plane is a bit difficult to spot in this photo (it shows up better in color). It is 45° up from the far end of the tape.

Below - Jerry Tonnelli about to launch in the fly-off. Jerry's plane is a highly unusual configuration, having a flat center section with upswept tips and a V-Tail. It looked very modern for a BUBW!

Results of BUBW Contest - August 1999

Team Scores

	Team	# of flyers
1	TOSS	12
2	SSJSS	3
3	HSS	2
4	SCSA	3
5	SFVSF	2

Right - The Individual winners, Mike Reagan (TOSS) on the left took first place from Jerry Tonnelli (SSJSS) by the narrowest of margins in the flyoff.

Left (previous page) - The (TOSS) Team winners, Mike Reagan, Don McNamee, Larry Jimenez and Art McNamee.

More Pictures from the Contest

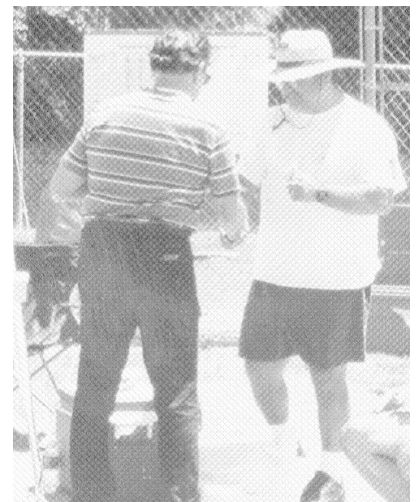

Left - The Table 'o Loot, showing individual and team trophies and the pile of stuff raffled off at the end of the contest.

Below - Pilot's meeting, Don "telling it like is going to be"

Above- Doling out the raffle prizes
Below - Larry picking up 4th. place

Larry's Name Badges

Larry Jiminez has done name badges for some club members and would like to know whether anyone else is interested in getting one. They're about 3" by 1 1/4", nicely finished in dark blue with the club emblem, club name and member's name etched in white. He gave me a line drawing of the badge which doesn't do them justice so I scanned mine which gives you a better idea of what they look like. (Note that the picture is a negative.)

Larry will order more if there's interest (he needs a few to make the order economic). They cost \$6.50 each. If you want one call him on

MARTIN USHER

Club Contact

The article on Page 1 suggests that we may as a club decide to commit "resources" (that's money to you) to this new organization. Its in everyone's interest to understand what's involved and what our commitments are likely to be and its important for the club to hear your views. If you can't make it to the meeting you can make your views known in writing, EMail or telephone (use this as a last resort because the message could get lost). Contact Martin Usher at the address on the front of the mailer, EMail him at: martin_usher@prodigy.net or call on 492.1176 and I'll make sure that your views are heard at this meeting.
