Homeless Again (Almost)

Last month saw us evicted from Monte Sereno because the homeowner's association wanted a very significant amount of money to allow us to meet there. We convened at short notice at the Greenhouse Cafe for the April meeting but this was still running its Winter hours and closed at 8:00pm, giving us not very much time for a meeting that was supposed to start at 7:30. Gary thought he had a room set up at the Grinder Restraunt in Moorpark but the deal fell through because the business got back to him demanding \$600 to "reserve" the space for a year.

Gary went back to the Greenhouse which is now running its Summer hours (closed at 9:00), a business that would be very pleased to accommodate us. So we're back at this restraut (map on the cover) and we're going to try to start the meeting a little earlier than 7:30 so we don't end up standing around in the parking lot.

Indoor Flying at Redwood

The last Friday in April was our first opportunity to try out the new gym at Redwood for indoor flying. It proved to be OK apart from the air conditioning which we couldn't figure out how to turn off. We were allowed to fly in there provided we had footwear that didn't mark the floor and we flew lightweight (<2oz) models that were either unpowered or powered by rubber. If there is sufficient interest (and someone — anyone — can figure out how to turn the A/C off) then we can get the gym on the last Friday of each month. The school is cooperative because this activity is viewed as educational. Flying these light models is both an art and a lot of fun. They require careful trimming and the fly very slowly. The rubber motors rotate the propellor maybe two or three times a second and the models fly at barely walking pace..

It really is very difficult to snap these models in flight. (Right) Myles demonstrating the use of

We decided in the April meeting to move May's contest to the first Sunday in May because too many people had conflicts on the Saturday before Mother's Day.

Modified / Amended (SC)2 HLG Contest Rule

A new rule has been added to the (SC)2 HLG rules concerning substitute throwers. It reads:-

9) All pilots must launch and catch their own models unless a substitute thrower has been authorized by the CD to launch (and catch) for a pilot who has a disability which the CD has determined will not allow him/her to launch or catch his model safely or effectively. When a substitute thrower has been authorized he must make physical contact with the pilot
