

TOSSUP 03

Fellow TOSS members,

A MESSAGE FROM YOUR PRESIDENT -

Thanks (Bob) for issuing the notice for our two yearly contests, and a plea for help!! I wanted to help out early and back up your plea by compiling a NEEDS LISTING for holding these contests before our next monthly paper goes out, and before the next meeting this July. Please find attached the list. Please add to the list as you see fit. I racked my brain, but for sure, there are other details I have not remembered. Ideally, we ought to issue the list with the next news letter with a plea for any and all who can, to please sign up for any of the things on the list they could provide and e-mail you back. We would like those volunteers who have interest in helping out to come to the July club meeting in order to go over any questions on what they want or could do to help out. That way, we can get things squared away for these contests. I think all of us as a club want to continue to host a well run contest that is fun for flyers to attend, and that continues to draw flyers back (not to mention how important the revenues can be to our club treasury)..

Thanks,

Gary

See the next page for the "to-do" list.

Also — Lex is still looking for a CD for the HLG contest.....time is running short and he may have to cancel if noone can step up.

HELP WANTED

This is the "wanted" sheet for the August contests. If you can add to this please let Gary know and/or turn up at the July's club meeting (7/30) and volunteer

DUTIES OR ITEMS NEEDED	WHO CAN PROVIDE

 Subject: [RCSE] SoCal RES Contest July 27th
 Date: Monday, June 30, 2003 6:12 PM

The Inland Soaring Society is holding its first RES Challenge on July 27th in Riverside, CA.

We will be using the AYSO soccer fields for the contest, so there are shade trees at the edge of the field, picnic tables, and built-in restrooms. Oh, and did I forget to mention.....GRASS!!! (That's that green stuff we'd land on all the time if we could.)

The entry fee will be a whopping 7 dollars. 4,6,10 and 7 minute tasks. 25' landing tape, in-or-out.

Here's a link to the contest flyer and map:
<http://www.clubedsf.org/flyer.pdf>

Now I guess I better get started building my Majestic, as I've already offered Mike Lee the use of my Oly II for the contest.

Martin, I notice that you don't have a "for sale, trade, wanted, lost, found" column in your newsletter. Still, maybe you could place the following note somewhere:

FREE to a good home -- my contest-winning, almost antique WIND-SONG which is now devoid of any servos and requires a little TLC (paint, etc.) to the fuse. Would also be a good idea to fit servos in conventional locations with conventional electronic mixing techniques instead of the mechanical gobbledegook system that this gallant bird used to fly with.

Also **FREE** to a good home (maybe even the same one) is my contest-winning 2 meter PIXIE (mini windsong). Same comments as above except that this one still has the four original JR servos intact as well as the nifty mechanical control setup that I alluded to above. Nice to look at if only for the nostalgia of witnessing how things were done before all the fancy electronic radio systems hit the market. Yes, it really was possible to fly at one time with a very cheap radio (by today's standards).

My friends know that I fly gas-powered model planes now. What they don't know is that my mobile home is crammed to the gills with model planes and I need to free up some space for more stuff (you know what I mean).

 Subject: Imagine running into TOSS in Davis
 Date: Monday, June 23, 2003 7:28 AM

Hi Martin,

We exchanged Email probably about a year ago after I saw your Email on one of the Soaring lists and you had mentioned TOSS... I belonged to TOSS in 85-91.

I went to Davis, CA yesterday to observe day two of the SVSS Spring Fling. Imagine my surprise to see 3 yellow TOSS tee shirts walking around. Gary Filice, Mike Reagan and Mike Stern were there doing their thing. Enjoyed talking with them and catching up on some of the news concerning club members I knew. Really enjoyed drooling over Mike Reagan's AVA RES class plane. I have been reading of Mark Drella's Bubble Dancer which is apparently the "roots" of the AVA. I have a set of the BD laser cut ribs and a tail boom, but I think it's beyond my current building skills/patience.

Not sure I was introduced to all three guys yesterday, if you get the chance please let them know "who they were talking to."

I have been flying a couple of park flyers lately and I'm finishing off an electric Aspire (2 meter ARF) with an Astroflight 20 geared as we speak. Just sport flying here in the Sierra foothills and don't have a local field that is large enough to use a full high start.

The new Web site looks great.

Bob Goldsmith

Hi Martin,
 Just sending you a report and a few pictures from Sacramento Valley Soaring Society "Spring Fling" contest on June 21 and 22. As you probably heard as some of us also did, and rather in a last minute fashion, the Spring Fling at SVSS is now officially replacing Pasadena's Rose Bowl Festival as the 2nd leg of the South West Triad!! It is sad to say good-bye to Pasadena as the 2nd leg. The other two legs are still Visalia and Phoenix. I got word, and I tagged along with Mike Reagan and Mike Stern. My wife Debbie and son Brian went along with me to provide a shoulder and a timer to lean on. The SVSS field is just south of Davis, which is just west of Sacramento. Davis is quite the college town with a really nice section of suburbs that harken back to the 50's. The field is actually on a nature preserve devoted to ground dwelling owls - of all things, and they did occasionally make an appearance during the contest. The field was GRASS - though quite dry, it was still GRASS and not HARD DIRT!

The flying conditions are similar to Visalia, being made up of huge lift and huge sink. The conditions could catch the sleepy pilot off guard with some short times. The field is well organized and the layout is similar to Visalia. The landing zone was a ladder type with 2 foot squares starting at 75 points in the far square, down to 50 points in the 2nd square, up to 100 points in the center square, back to 50, and finishing with 75 points in the nearest square. Seemed simple enough, but try it in some tricked-out down-wind conditions! Same with the launches -- all down wind for the two days of flying! Now you know why I occasionally leave the winches set up the way I do on down wind days -- good practice for contests that always seem to throw down-wind conditions at the pilots!

Mike Reagan cleaned up in RES with a fantastic 1st place victory that was made possible with skills that only Mike Reagan brings to a contest. At the same time, Mike Stern did equally a fantastic job with a 1st place victory in the Grey Cup class! Congrats to both guys! Mike Reagan and I also flew the unlimited class with myself coming in 17th and Mike taking 19th. Not bad considering we both dropped some times in the 7 min. rounds. An added attraction was the best BBQ I have ever tasted at any contest so far. They really did it up good with 1st class food. We really had fun flying at SVSS, and look forward to returning next year for another go at it.

Gary

1) Contrast in landing styles?

2) (below) A classic, IMHO

BUILT UP BENT WING CONTEST

SUNDAY, AUGUST 10, 2003

LOCATION: REDWOOD SCHOOL,
THOUSAND OAKS, CA
Thomas Guide: Pg 525, E6

CONTEST DIRECTOR: Art McNamee
Assistant CD: Don Northern

SIGN UP: 8:15 AM
PILOT'S MEETING: 8:45 AM

AWARDS: (Trophies Plus)

OPEN: 1st thru 5th
